CONTENTS IN BRIEF

Special Reports

The 23rd International Congress of Pediatrics and The 2nd International Congress on Pediatric Nursing held in Beijing .......................................................... 1
Chinese Pediatric Society and Editorial Board of Chinese Journal of Pediatrics, Chinese Medical Association

Brief summary of subspecialties and special sessions of pediatrics in The 23rd International Congress of Pediatrics .......................................................... 4
Chinese Pediatric Society and Editorial Board of Chinese Journal of Pediatrics, Chinese Medical Association

Editorial

Nutrition and development of children's skeleton .......................................................... 20
DING Zongyi

Original Articles

Early treatment of experimental oleic acid-induced acute lung injury with inhaled nitric oxide and high frequency oscillation ........................................... 23
ZHOU Tao, CHEN Xiannan, FAN Xunmei, et al

The protection of group B streptococcus type III conjugation vaccine to newborn mice against lethal GBS infection .................................................. 28
LI Li, YE Hongmao, SHEN Xuzhuang, et al

Experimental peripheral neuropathy induced by serum and peripheral blood mononuclear cells immunized with Campylobacter jejuni in rats .............................................. 32
ZHANG Jiemin, CAI Fangcheng

Nitric oxide synthase gene expression in hyperoxia-induced lung injury in premature rats .............................................. 37
XU Feng, FOK Taifai, YUNG Edmund, et al

Expression of E-selectin in cerebrovascular endothelium in a brain inflammation model .............................................. 41
LING Yaping, XIAO Desheng

Nasopharyngeal carriage status of common pathogenic microorganisms in healthy children and its clinical significance .................................................. 45
HOU Ancun, LIU Yuhua, XIN Deli, et al

Lecture

The progress in diagnosis and treatment of influenza in children ...................................... 54
LÜ Quan, SHEN Ming, JIANG Zaijun

Reviews

Hearing screening of the newborn .......................................................... 56
SHEN Xiaoming

Gastric intramucosal pH monitoring .......................................................... 59
ZENG Jiansheng, FAN Xunmei

Members of the Sixth Editorial Board of Chinese Journal of Pediatrics .................................. 64
CONTENTS IN BRIEF

Editorial

Enhance the study on the diagnosis and management of Kawasaki disease ......................................................... 65
LI Wanzhen

Kawasaki Disease

Evaluation of coronary circulation impairment by transthoracic Doppler echocardiography in children with Kawasaki disease ................................................................................................................ 68
XIA Bei, QIU Baoming, LI Chengrong

Effect of NF-κB on endothelial damage mediated by inflammatory cytokines in Kawasaki disease .................. 72
FU Jinrong, LI Chengrong, ZHOU Yufeng, et al

Effects of IVIG on T_{h1}/T_{h2} of children with Kawasaki disease ................................................................. 75
PI Guanghuan, YANG Xiqiang, WEI Yushu, et al

Original Articles

Clinical significance of WT1 gene expression in peripheral blood cells and bone marrow cells of childhood leukemia .................................................................................................................... 78
BAI Xiaoling, ZHAO Hongning, YAO Hui, et al

Isolated non-compaction of ventricular myocardium: a report of 4 cases ......................................................... 81
WANG Xiaofang, HAN Ling, ZHANG Guizhen, et al

Significance of hepatitis B virus DNA quantity in transmission between mothers and infants ....................... 84
LIN Jian, LIAO Shi, GUO Guangzhou, et al

Febrile seizures of rats during brain development enhance the future brain injury of seizures ....................... 88
ZHANG Guojun, JIANG Yuwu, WU Xiru

Analysis of bronchoalveolar lavage fluid components in children with chronic cough and wheezy diseases ....... 92
JIAO Anxia, LIU Xicheng, JIANG Qinbo, et al

Congenital atransferrinemia: a case report ........................................................................................................... 96
LIN Guozhen, CHEN Le, WANG Wei, et al

Preventive effect of heparin on the development of nephropathy in Henoch-Schenlein purpura – a randomized controlled clinical trial ................................................................. 99
HE Yanyan, PAN Wei, SONG Hongmei, et al

Reference values and predicted equations of lung function in southern Chinese children ................................. 103
ZHENG Jinping, LI Minran, AN Jiaying, et al

Reviews

Current opinions on etiology and pathogenesis of Kawasaki disease ................................................................. 120
WANG Hongwei

Thrombocytopenia in newborns and the effects of thrombopoietin the pathogenesis of neonatal thrombocytopenia ........................................................................................................................... 122
DING Guofang, YANG Mo

Members of the Eleventh Editorial Board of Chinese Journal of Pediatrics .......................................................... 128
