CONTENTS IN BRIEF

Editorials

More efforts should be made to improve the level of diagnosis and treatment of infectious diseases of newborn infants

HUANG De-min, TONG Xiao-mei

881

Neonatal Infectious Diseases

Clinical and immunological studies on neonatal infectious pneumonia

CHEN Chang-hui, YÉ Chang-ning, LI Mao-jun, et al

884

Early diagnosis of the premature infant nosocomial infection by clinical assessment

QI Jun-ming, DING Guo-fang

889

Experimental study on cerebral white matter damage in neonatal rat after intrauterine Escherichia coli infection

YU Hui-min, YUAN Tian-ming, TANG Hong-feng, et al

893

Standard/Protocol/Guidelines

Protocol for diagnosis and treatment of neonatal septicemia

The Subspecialty Group of Neonatology, Pediatric Society, Chinese Medical Association and The Editorial Board, Chinese Journal of Pediatrics

897

Lectures

Problems in and strategies for antibiotics treatment of neonatal infections

SHAO Xiao-mei

900

Progresses in diagnosis and treatment of intrauterine infection with cytomegalovirus and human parvovirus B19

WU Wan-fang

902

Progress in the clinical use of anti-arrhythmic drugs

LI Wan-shen

905

Conference summary

Summary of the 2003 National Symposium of Neonatal Infection and Critical Illnesses

YE Hong-mao

909

Original Articles

Neuroprotective effect and mechanisms of hypothermia in neonatal rat cerebral hypoxic-ischemic damages

ZHÚ Chang-lian, WANG Xiao-yang, CHÉNG Xiú-yóng, et al

911

Late-onset riboflavin-responsive multiple acyl-CoA dehydrogenase deficiency (glutaric aciduria type II)

LIANG Yan, LIU Li, WEI Hong, et al

916

Regulation of NF-κB/P65 by MDM2 in acute lymphoblastic leukemia in childhood

HU Qun, ZHOU Mu-xiang, LIU Shuang-you, et al

921

Major histocompatibility complex class II transactivator (CIIA) hammer-head ribozyme transfer inhibits major histocompatibility complex class II (MHC-II) expression in Jukart cells

GÚO Róng, ZOU Ping, SONG Yong-píng, et al

925
Relationship between single nucleotide polymorphisms in thiopurine methyltransferase gene and tolerance to thiopurines in acute leukemia ............................................................... 929
MA Xiao-li, ZHU Ping, WU Min-yuan, et al

Damage to peripheral nerves induced by Campylobacter jejuni exotoxin ................................................................. 934
XIE Long-shan, CAI Fang-cheng, GAO Yu-xing, et al

Protective effect and mechanism of pretreatment with curcumin on infectious brain edema in rats .......................... 940
LUO Fang, HUANG Rong, YANG Yu-Jia, et al

Research Reports

Effect of early hemofiltration on endotoxin and cytokines plasma levels of endotoxemic pigs ........................................ 945
LI Tao, WU Yan-xiang, YANG Zhi-yong, et al

Influence of hypoxia preconditioning on hypoxia-inducible factor-1α in hypoxic-ischemic brain damage in the neonatal rat ................................................................................................. 946
ZHENG Xiang-rong, YANG Yu-jia, JIA Yan-jie, et al

Clinical Experience

Infantile tetramine poisoning treated with sodium dimercaptosulfonate: clinical analysis of 54 cases ................ 948
JI Jing-tang, TIAN Xue-qin

Effect of hemoperfusion on prognosis in dushuqiang (tetramine) poisoning ............................................................ 950
CUI Fa-xin, CUI Jing, WANG Can-dong

Monitoring and intervention study of 57,292 perinatal infant congenital malformation and death in Jiaxing City ........................................................................................................................................ 951
YANG Jian-fan, LIN Chun-lan, YANG Rong-wei, et al

LRP gene expression and its clinical significance in childhood acute leukemia .......................................................... 953
HU Xiao-bin, HU Wan-ru, GUO Cheng-ji, et al

Treatment of a child with myelodysplastic syndrome by cord blood transplantation .................................................. 954
WU Nan-hai, LUAN Zuo, YANG Ping-di, et al

Reviews

Obstructive sleep apnea syndrome in children .................................................................................................................. 956
ZHAO Hui-ping, CAI Yi, TANG Jian-guo

Case Reports

Atrial flutter in a neonate ......................................................................................................................................................... 888
SUN Ge, LI Meng-xia, CHEN Yi

Sucessful rescue of a child with critical autoimmune hemolytic anemia in whom transfusion was difficult .......... 920
SHI Shu-wen, SONG Hua, TANG Yong-min, et al

Chymothorax in a newborn infant ......................................................................................................................................... 933
SU Wei-dong, DENG Xiu-rui, BAO Man-hua

Streptococcal toxic shock syndrome in a case ...................................................................................................................... 939
WANG Li-jie, YUAN Zhuang, LIU Chun-feng, et al

A case with neonatal Kawasaki disease ............................................................................................................................. 960
SUN Zheng-yun, WEI Zhao-xia

Members of the Subspecialty Groups, the 13th Society of Pediatrics, Chinese Medical Association .......................... 975

Members of the Twelfth Editorial Board of Chinese Journal of Pediatrics ................................................................. 976
